1350SJP Telescopic Boom Lift

QUESTIONS TO ASK

- What are the ground conditions in the work area?
- What are the site conditions travelling around the site?
- What is the working height needed for the job?
- What is the outreach required for the job?
- Do you need an extension lead outlet in the platform?
- Will an inbuilt Miller 5.5kVA generator make the job easier?

KEY SELLING POINTS

- Smooth control, proportional hydraulic 4 wheel drive, with two speed ranges
- Proportional lift and swing controls at the platform for fast functionality
 Oscillating front steer axle with the boom lowered in the travel position,
- assists 4 wheel drive traction
- Extending axles and 4 wheel steer, and crab steer
- Jib boom and basket rotate
- Jib PLUS feature allows jib rotation each side of centre line
- Cylinder boots protect cylinder rods from overspray and contaminants
- Large lug pattern urethane filled tyres
- Multi axis 5 x 5 degree level sensor
- Plug in JLG analyser at platform and base to indicate system functions for servicing and adjustment
- Deutz Engine TD2011 L04 turbo. High speed, 4 cylinder, liquid (oil cooled) engine with pre-glow and post-glow feature reduces emissions
